PROFESSIONAL SUMMARY

Senior Full Stack Developer with 9+ years of experience building web and mobile systems with Laravel, React and Next.js. I've worked on 70+ projects across e-commerce, SaaS, government and enterprise, and led the team on many of them. I look after an online store with 400+ weekly orders and Rp200M+ in weekly transactions, and I designed a paid booking SaaS for multiple businesses. I like owning a project from the first client meeting to going live.

TECHNICAL SKILLS

Backend: PHP, Laravel, Lumen, Node.js, REST API design, system and database design

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS, Bootstrap

Databases: MySQL, PostgreSQL

Tools and DevOps: Docker, Git, Figma (UI handoff)

Leadership: Technical lead, system architecture, requirements analysis, client liaison, mentoring junior developers

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer / Lead Developer, Kreatifcity — Apr 2017 - Present

- Own and maintain Eyelovin, an online store with 400+ weekly orders and Rp200M+ in weekly transactions. I've looked after it since 2018.
- Led the frontend rebuild from React.js to Next.js for better SEO and speed.
- Designed backends and REST APIs in Laravel, and built frontends in React.js and Next.js, for clients in many industries.
- Connected payment gateways (Midtrans, Xendit, DANA) and shipping providers (SiCepat, Anteraja, JNE, GoSend, GrabExpress, Lalamove).
- Led teams on long-running production projects: formed the team, chose the stack, designed the system and mentored junior developers.
- Worked with clients directly on requirements and technical planning, from the first meeting to delivery.

Programming Instructor, SMK Wikrama 1 Jepara — 2016 - 2017

- Taught web programming to final-year vocational students getting ready for the industry.
- Built an online exam system (with a listening feature) and a digital report card system, used by hundreds of students and teachers. Connected the two to automate assessment and reporting.

SELECTED PROJECTS

Bukujanji - Multi-tenant Booking SaaS — Technical lead / architect

- Formed the team, chose the stack and designed a paid SaaS with 10 live booking types, around 400 database tables and about 2,000 API endpoints.

Pusaka, Ministry of Religious Affairs of Indonesia - Government Mobile App — Backend developer

- Built the backend services, REST APIs and a custom CMS (Laravel, Lumen) for an app with 1M+ downloads on Google Play.
- Helped shape the system architecture and database design as part of a team.

PLN Group (PLN Batubara, PLN Energi Primer Indonesia, PLN Batubara Niaga) - Corporate Websites — Project lead / full stack

- Led development and delivery of corporate websites on Laravel with a custom CMS. Built the responsive UI with Tailwind CSS and Bootstrap from Figma designs.

AIPA (ASEAN) - AIPALync Website and AIPA Lync GO Mobile App — Full stack / backend

- Built the organization's website and the Laravel Lumen backend for the mobile app, covering real-time updates, event check-ins and document access for ASEAN parliament members, researchers and the public.

Bidan Delima - Official Website and Online Examination System — Lead developer

- Led development of the official website and the online exam platform.
